The Fund engages active tactical asset allocation between the asset classes which is determined by analyzing the economy, which influences the business cycle, and market factors.
Asset Allocation	Equities: 20% - 70% of the Fund's NAV Fixed income securities/ liquid assets: 30% - 80% of the Fund's NAV
Performance Benchmark	A composite of FTSE Bursa Malaysia 100 Index (60%) and RAM Quantshop MGS All Index (40%)

4. Who am I investing in?

Fund Manager / Manager	Kenanga Investors Berhad (“Manager”)
Trustee	CIMB Commerce Trustee Berhad (“Trustee”)

5. What are the possible outcomes of my investment

Unit prices for this Fund may go down as well as up. The Fund is exposed to a variety of risks by nature of the investment strategy of the Fund. As such, the Fund does not provide guarantee on the investment amount nor does it guarantee a fixed rate of return.

KEY RISKS

6. What are the key risks associated with this product?

Investors are advised to read the Fund's prospectus and understand the risks involved and if necessary, consult a professional adviser for a better understanding of the risks before investing.

General Risk related to the Fund

Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's net asset value.
Manager's Risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or

	guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
Liquidity Risk	Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If a fund holds assets that are illiquid, or are difficult to dispose of, the value of the fund will be negatively affected when it has to sell such assets at unfavourable prices.
Inflation Risk	This is the risk that investors' investment in the fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.
Non-Compliance Risk	This refers to the current and prospective risk to the unit trust fund and the investors' interest arising from non-compliance of regulations imposed by the Capital Markets and Services Act 2007 and the guidelines, deeds, prospectuses and/or manager's internal policies and procedures by the manager. Risk of non-compliance can lead to diminished reputation, reduced franchise value, limited business opportunities and reduced expansion potential for the company. Accordingly, non-compliance may affect the investor's investments by causing a fall in the value of the unit trust fund.
Loan Financing Risk	This risk occurs when investors take a loan/financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments. In the event units are used as collateral, an investor may be required to top-up the investors' existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the loan.

Specific Risks related to the Fund

Interest Rate Risk	Interest rate risk refers to the impact of interest rate changes on the valuation of a bond/sukuk or money market instruments/ Islamic money market instruments (hereinafter referred as "investment") portfolio. When interest rates rise, the investment prices will generally decline and this may lower the market value of the investment portfolio. The reverse may apply when interest rates fall. The risk will be mitigated via the management of the duration structure of the investment.
Credit and Default Risk	Credit risk relates to the creditworthiness of the issuers of the fixed income securities/sukuk or money market instruments/Islamic money market instruments (hereinafter referred as "investment") and their expected ability to make timely payment of interest/profit and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the investment. In the case of rated investment, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
Reinvestment Risk	Reinvestment risk arises when an issuer of bonds/sukuk decides to exercise its right to pay principal on an obligation earlier than the expected maturity date, especially during times of declining interest rates. Consequently, the Fund may experience lower returns due to having to reinvest in lower yielding securities.
Counterparty Risk	Counterparty risk occurs when a financial institution that has entered into a securities trade defaults on its obligations under the agreement. A fund may encounter unit price volatility due to this risk arising.
Stock Specific Risk	Prices of a particular Shariah-compliant securities/ stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's net asset value.
Derivatives Risk	The Fund may from time to time use derivatives for hedging. Derivatives are financial contracts whose value depend on, or are derived from, the value of an underlying asset, reference rate or index. Such assets may include shares, interest rates, currency exchange rates and stock indices. The use of derivatives may result in a lower NAV price. Some of the risks associated with derivatives are market risk, management risk, credit risk, liquidity risk and counterparty risk. While the hedging strategy will assist in mitigating the potential losses by the Fund, any potential gains from the hedging strategy will be capped as well.

Please be advised that if a Unit Holder invests in Units through an institutional unit trust advisers which adopts the nominee system of ownership, the unit holder would not be considered to be a Unit Holder under the deed and consequently not have all the rights ordinarily exercisable by a Unit Holder (for example, the right to call for a Unit Holder's meeting and to vote thereat and the right to have the Unit Holder's particulars appearing in the register of Unit Holders of the Fund).

FEES AND CHARGES

7. What are the fees and charges involved?

The table below describes the charges that you may DIRECTLY incur when you buy or redeem Units of the Fund.

Sales Charge	Up to 6.50% of the Fund's NAV per unit
Redemption Charge	Nil
Transfer Fee	Nil
Switching Fee	Nil
Other Charges	There are no other charges (except charges levied by banks on remittance of money) payable directly by investors when purchasing or redeeming units of the Fund.

Note: The Manager may waive or reduce the sales charge imposed. Investors may also negotiate for a lower sales charge with their preferred distributor, subject to the respective channels' qualifying criterion.

The table describes the fees that you may INDIRECTLY incur when you invest in Units of the Fund.

Annual Management Fee	1.55% of the NAV of the Fund per annum.
Annual Trustee Fee	0.07% of the NAV of the Fund per annum.

All fees and charges payable to the Manager and the Trustee are subject to the goods and services tax/ sales and services tax/ other taxes of similar nature as may be imposed by the government or other authorities from time to time.

YOU SHOULD NOT MAKE PAYMENT IN CASH TO A UNIT TRUST CONSULTANT OR ISSUE A CHEQUE IN THE NAME OF A UNIT TRUST CONSULTANT.

VALUATIONS AND EXITING FROM INVESTMENTS

8. How often are valuations available?

Valuations are valued daily and you may refer to www.kenangainvestors.com.my for the unit price.

9. How do I exit from this investment and what are the risks and costs involved

Unit Holders may redeem their investments in the Fund on any Business Day by completing the prescribed redemption request form or such other manner as the Manager may accept and returning it to the Manager on any Business Day; the redemption request form is available at the office of the Manager.

Units redeemed during dealing hours (i.e. from 8.30 a.m. to 4.00 p.m.) on any Business Day will be redeemed at the NAV per Unit calculated as at the next valuation point after the request is received (i.e. "forward pricing").

Any redemption request received after the dealing hours on any Business Day will be taken as a redemption request made on the next Business Day.

The minimum redemption amount is 500 Units for each transaction or such other lower amount as the Manager in its sole discretion allows.

However, if the redemption request leaves a Unit Holder with less than 500 Units (minimum holdings), the Manager reserves the right to liquidate the balance of the Units held in the Unit Holder's account.

Redemption proceeds will be paid within ten (10) days from the date the Manager receives a duly completed redemption request form.

Cooling-Off Right

A cooling-off right is only given to an individual investor who is investing for the first time in any unit trust funds managed by the Manager but shall not include the Manager's staff and a person registered with a body approved by the Securities Commission Malaysia ("SC") to deal in unit trusts.

The cooling-off period shall be within six (6) Business Days from the date the Manager receives the duly completed form. "Cooling-Off Period" or Cooling-Off Right" is not applicable to EPF Member Investment Scheme.

Note: Please read and understand the Fund's prospectus and its supplemental prospectus (if any) before investing in the Fund.

FUND PERFORMANCE

Average Total Returns

The basis of calculating the average total returns is by calculating the growth of the NAV of the Fund at the start point against the NAV of the Fund at the end point of the calculation period of 1 year, 3 years, 5 years and 10 years. We take into account and factor in all the distributions and unit splits into the NAV of the Fund for the purposes of the calculations.

	1 year 30/11/18 - 30/11/19 (%) Return	3 years 30/11/16 - 30/11/19 (%) Return	5 years 30/11/14 - 30/11/19 (%) Return	10 years 30/11/09 - 30/11/19 (%) Return
KDF	8.91	9.11	6.64	8.00
Benchmark	0.60	2.33	0.68	3.89

Annual Total Return

	Financial Year Ended 30 November									
	2010 (%)	2011 (%)	2012 (%)	2013 (%)	2014 (%)	2015 (%)	2016 (%)	2017 (%)	2018 (%)	2019 (%)
KDF	8.38	8.02	18.44	12.73	0.71	1.04	4.28	24.74	-4.50	8.91
Benchmark #	14.01	2.11	7.59	8.57	1.46	-3.16	-0.22	7.98	-1.51	0.60

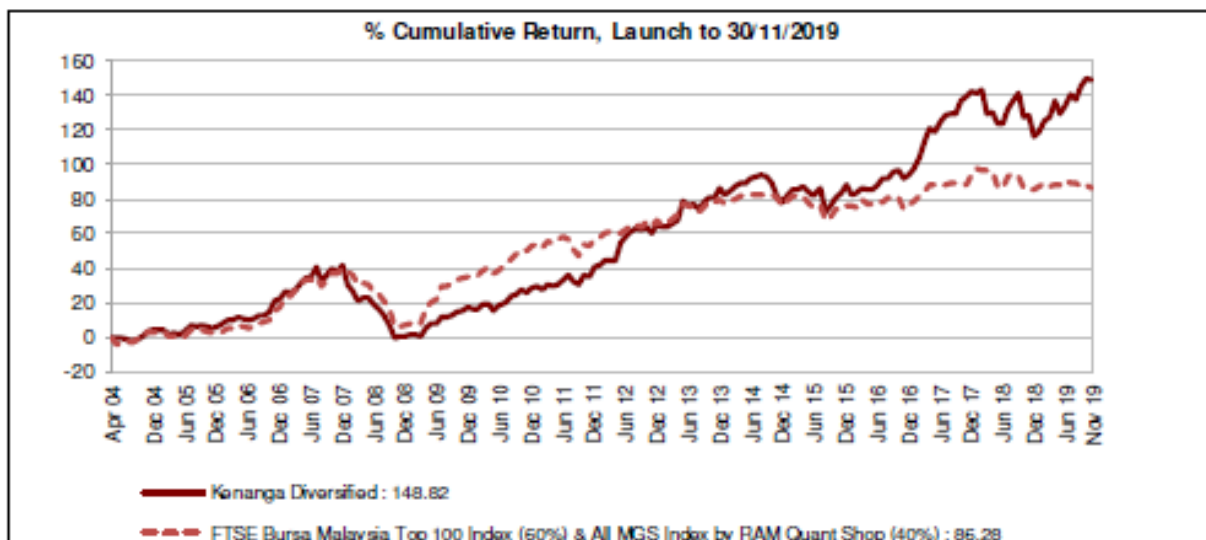

Source: Lipper IM and Novagni Analytics and Advisory Sdn Bhd

#The performance benchmark for KDF has been changed to a composite of 60% FTSE Bursa Malaysia 100 Index and 40% RAM Quantshop MGS All Index on 15 August 2012. The previous benchmark was a 55% FTSE Bursa Malaysia 100 Index and 45% RAM Quantshop MGS All Index. The performance benchmark figures as shown above for year 2006 to year 2015 is reflective of the previous benchmark.

1-Year Fund Performance Review

The Fund outperformed the benchmark by 8.31% with a positive return of 8.91% for the financial year under review. The outperformance was due to good stock selection on equity front and timely investments into fixed income securities which rallied during the year under review.

Performance Chart Since Inception

Source: Novagni Analytics and Advisory

Portfolio Turnover Ratio (PTR) and Management Expense Ratio (MER)

	Financial Year Ended 30 November		
	2019	2018	2017
PTR (times)	1.15	1.19	0.82
MER (%)	1.85	2.04	2.66

Explanation of significant change in the PTR

PTR is relatively stable for the last two financial years under review given similar trading activities for both equity and fixed income securities.

Explanation of significant change in the MER

MER ratio of 1.85% indicates an expense of RM0.0185 for every RM1.00 of the average NAV of KDF during the financial year ended 30 November 2019. MER is lower against previous year mainly due to lower recovered expenses incurred.

Distribution

Year Ended 30 November 2019	Year Ended 30 November 2018	Year Ended 30 November 2017
No distribution has been made during the period.	No distribution has been made during the period.	No distribution has been made during the period.

PAST PERFORMANCE OF THE FUND IS NOT AN INDICATION OF ITS FUTURE PERFORMANCE.

APPENDIX : GLOSSARY

Business Day	Means a day on which the Bursa Malaysia is open for trading.
Management Expense Ratio (MER)	$\frac{\text{Total annual expenses incurred by the Fund}}{\text{Average NAV of the Fund calculated on daily basis}} \times 100$ <p>This ratio will inform you of the total expenses incurred by the Fund during the year as compared to its average NAV. Total expenses include management fee, trustee fee and expenses incurred for fund administrative services. A low MER indicates the effectiveness of the Manager in managing the expenses of the Fund.</p>
MGS	Means Malaysian Government Securities.
medium to long term	Refers to a period of three (3) to five (5) years.
Net Asset Value (NAV)	Means the total value of the Fund's assets minus its liabilities at the valuation point. In computing the annual management fee and annual trustee fee, the NAV of the Fund should include the management fee and the trustee fee for the relevant day.
NAV per Unit	Means the NAV of the Fund divided by its total number of units in circulation.
Portfolio Turnover Ratio (PTR)	<p>Refers to the measure of trading activity or how frequently assets within a fund are bought and sold by the Manager. A fund with a 0.5 times portfolio turnover ratio, for example, replaces half of its holdings during the period under review. A fund with a high portfolio turnover rate will typically incur more transaction costs than one with a low portfolio turnover rate.</p> <p>The computation of PTR is as follows :</p> $\text{PTR} = \frac{(\text{Total acquisitions of the Fund} + \text{Total disposals of the Fund}) / 2}{\text{Average NAV of the Fund calculated on a daily basis}}$
short-term	Refers to a period of less than one (1) year.
Unit(s)	Means a unit of a Fund and includes a fraction of a unit.
Unit Holder(s)/ Investor(s)	Means the person for the time being registered under the provisions of the deed as the holder of units and includes the Manager and joint-holder.
